Ban On Commercial Surrogacy Is Necessary

By Youth Forum - January 23, 2017

161 0

Surrogacy was meant to be one of the most powerful initiatives but as soon as the word "Commercial" got associated, things began to shatter out. Here is a short article by Sneha who explores all the faces of this die and explains why the word "Commercial" should be detached immediately from it.

Every woman is complete after giving birth to a child! Taking into consideration the negative aspect, there are some women out there who are deprived of this precious opportunity due to medical complications associated in conceiving the sperm. On the other hand, we simply cannot ignore the fact that motherhood is a joyous right and that nobody should be entitled to take this right away from her. Following the same reason, all the needy mothers now have the opportunity to become one with the introduction of the concept of **surrogacy or renting of a womb on rent**.

But with the passage of time and advancement of technology, the concept of traditional

Why are we turning life into a race?

By Youth Forum - December 23, 2016

143 0

Life is a race where we compete against infinite number of unknown participants, all of them trying to leap across their respective hurdles."

Here are Vernika Tanwani's views on how life is transforming into a race.

From a very young age, our children are told that they need to make it big if they wish to survive in this world. And making it big essentially means earning, if not a lot, then at least more than what their parents do. Every generation survives a constant pressure of being more successful than their predecessors. We start with teaching kids to excel in every field. We dearly accept average performance in ALL the fields rather than extraordinary in one, if others are being compromised. Little do we understand that we are actually killing the real skills and talents that would really, in its true sense, help the kids in making it big.

This race starts with procuring a seat in a good school and never quite ends. The schools witness parents insanely clearing interviews for their kids, running around like maniacs, finding the best schools. Then, before the kids know it, they are laden with loads of books on their backs and immense pressure on their minds; they become participants in this run for excellence.

The Good Samaritan Law: How It Came to Being

By Youth Forum - January 23, 2017

207 0

Life itself is a composition of various derivatives. It takes intense courage, awareness and knowledge for an individual to harness the problems that others happen to face. A law, indirectly related to this module is the "Samaritan Law".

Here are the requisite facts and individualistic viewpoints put forward, exclusively for our readers by Anyatama Nayak.

According to a report by the World Health Organization^[1] "skilled and empowered bystanders play a crucial role in saving lives". This shows that in case of emergency situations bystanders can save lives when they are in a position that enables them to help others and not be worried of the consequences of this act to negatively affect them. Here it is important that the bystanders are not deterred from providing help. Thus the report goes on to state that enabling bystanders to help injured people it is necessary "to provide a supportive legal and ethical environment". However in India there have been various instances of people being hesitant to help in the fear of either being trapped in the legal system and to be held in detention unnecessarily.
